On-Call Runbook

1. Rotation

On-call rotates weekly, starting Monday 10:00. Primary and secondary responders are assigned per team. Handover notes are required and must be posted in the team channel before the rotation ends.

2. Severity Levels

SEV1 is a full outage or data loss and requires immediate escalation. SEV2 is degraded service affecting a large customer segment. SEV3 is a minor issue with a workaround available.

3. Escalation

If an incident is not resolved within 30 minutes for SEV1 or 2 hours for SEV2, escalate to the engineering manager and the incident commander. Status updates are posted every 30 minutes until resolution.

4. Postmortem

A blameless postmortem is required for every SEV1 and SEV2 incident. Action items must be tracked in the issue tracker with an owner and a due date within 10 business days.
